

Hop Shot

A micro dexterity game for 2 players in 10 minutes inspired by the Japanese sport of pole toppling.

Components

- 4 frogs: 2 each of brown and green
- 1 fly
- 1 leap/reference card

Setup

1. Select a play surface; ideally a smooth table or play mat around 3' per side
2. Each player selects a color and places their frogs along the edge of the play surface closest to themselves
3. Set the fly and leap card aside
4. Players take turns flicking one frog into play
5. Place the fly on top of the final frog to be flicked

Gameplay

Players attempt to win by knocking over the fly twice with an airborne frog.

Turns

1. The current player takes an action with 1 of their discs: **Flick** or **Leap**
2. After an action, see **Leaving Play** for any frogs that left play
3. If the player's first action is a **Flick**:
 - If the frog hits an opponent's frog, the current player may take an action with their other frog
 - Otherwise, the opponent may **Flick** their non-fly frog
4. The current player then ends their turn by placing the fly on the frog they least recently took an action with

Flick

1. The current player flicks 1 of their frogs along the play surface
2. If the fly is knocked over, return it to its frog and end the current player's turn

Leap

To **Leap**, there must be a frog between the player's frog and the fly:

1. Hold the leap card near the frog preparing to leap with one edge on the play surface, creating a ramp aimed at the fly
2. Flick the player's frog up the leap card toward the fly
3. If the frog hits the fly while still airborne and the fly falls over, the **Leap** is successful
4. The current player's turn ends

Leaving Play

- If any of the current player's frogs leave play, return them to their edge of the play surface
- If any opponent frogs leave play, the opponent flicks them back into play and the current player's turn ends

Game End

The first player to complete 2 successful **Leaps** wins.
